I graduated from Kansas State University in 2001 with a degree in Architectural Engineering. After graduation, we moved to Denver where we both worked for about 5 years before moving to Wichita. In 2010, I completed my Masters in Business Administration from Friends University. I am currently employed by Professional Engineering Consultants, P.A. (PEC) in Wichita as a mechanical engineer, where I lead a team of 9 mechanical engineers and designers predominantly working on healthcare related projects.

My wife Amy and I have three children; Madi (age 7), Holden (age 5) and Graeden (age 2). The kids keep us very busy with sports and activities. When not engaged with their activities, I like to golf. I also like to jog when I can find time. We are usually busy doing projects around the house, from yard work to finishing the basement.
