I was born and raised in the Kansas City area and I currently live in Overland Park. After high school I started off college at Creighton University in Omaha and went there for two years intending to major in biology. Once I realized my true love was math and not science, I transferred to KU to study engineering. I graduated from KU with my B.S. in Civil Engineering in 2014 and stayed at KU another year to get a M.S. in Civil Engineering in 2015. After graduation I started working at HDR where I have been for the last six years. I am in the bridge design group and work on mainly local projects in Kansas and Missouri. When I am not at work, I enjoy reading, cooking and baking, and gardening.

Fun Fact – I love spending my summer at the lake. My parents have a place at Table Rock Lake, and I try to spend as many weekends there as I can!

Favorite Quote – “Yesterday is gone. Tomorrow has not yet come. We have only today. Let us begin.” – Mother Theresa

My job would be a lot easier if deadlines didn’t always seem to come up quite so quickly or if there were a few more hours in the day.
