I graduated from the University of Missouri–Kansas City in 2001. Upon graduation, I worked at Delich, Roth and Goodwillie (DRG) Engineers until 2012, when I went to work for Hg Consult. I started in the Transportation field doing roadway and highway design. After my first few years, I got an opportunity to work on the US 65/Route 248 Interchange project in Branson, MO. What started as several iterations of trying to get a “Dog-Bone” Roundabout interchange to work turned into a Diverging Diamond after a couple were opened in Springfield with success. This also started my foray into Traffic engineering, where I received my Professional Traffic Operations Engineer certification in 2008.

I was born and raised in Jefferson City, MO, and have been living in Kansas City since I went off to college in 1997. I got married three years ago to Kelsey and we live with our dog Grace. We go back to Jefferson City fairly often to visit family and spoil our two nieces! I enjoy the Fall the most, when I can watch the Mizzou Tigers and the Chiefs play. And with my brother living in Birmingham, AL, the Crimson Tide has been my ‘adopted’ team. We try to make time to travel and take at least one trip a year. We took our first big trip in ’06 to Munich and the Bavarian region in southern Germany. Although we’ve been to several places since, each neat and different in their own way, we haven’t been able to match the enchantment and excitement of the first one.
